### MY PROJECTS

#### Apple.com Clone

- During the internship, I worked on the development of Apple.com clone in React Js, and developed 5 pages which are home, iPhone, tv, music, support, header and footer.
- <https://websoulapple.herokuapp.com/>

#### Android App - (Final Year Project)

- JOBKAR - A utility android app is designed to service customers on their move to provide locality based services with more user friendly interfaces. The app offers immediate solutions to mechanic service, food service, medical services, electric and electronic services etc. When the user is in need of a service, the app furnishes a list of nearby service providers from which the user can select. Then service provider will come to your doorstep.
